Dissipated power, Impedance and Voltage drop

Acti9 products

The following table indicates the average dissipated power per pole in W for a current equal to the rating of the device and at the operating voltage.

Rating (A)	0.5	1	1.6	2	2.5	3	4	6	6.3	10	12.5	13	16	20	25	32	40	45	50	63	80	100	125	
Circuit breakers																								
iC40/iC40N (1)		2.5		2			2.9	2.9		2		2.6	2.5	2.6	3	3.3	4.1							

(1) Dissipated power indicated in the table is the sum of phase+neutral.
