

AR8395 Buss Bar Amp Rating

As of this writing the AR8395 buss bar has not been rated for power grounding.

It is designed for low voltage applications.

Its intended use is to ground switches, routers, AV and other low voltage IT equipment to reduce noise from the system.

Because of this intended use the AR8395 Buss Bar has not been rated for amperage.

Should this product be rated in the future this document will be updated.
