

PowerChute™ Business Edition v9.5

Release Notes

Introduction

The PowerChute Business Edition Release Notes have the following sections:

- [What's new in this release](#)
- [Known Issues](#)

What's new in this release

The following features are new to PowerChute Business Edition v9.5:

- The Server and Console components have been removed.
- A single, unified Agent is used to manage any UPS device less than 5kVA in the Smart-UPS range.
- Multiple Agents can now be managed via SNMP, removing the 5 or 25 node limit.
- Additional glibc packages no longer need to be installed for 64-bit Linux operating systems, there is now a 64-bit PowerChute RPM.
- JRE Configuration Tool support for 64-bit Linux operating systems. The modified PcbeJreConfig.sh file can be found in the Documentation folder on the CD and on the [PowerChute Business Edition Product Page](#).
- Support for SUSE Linux via USB.
- **Security Enhancements**
 - SNMPv3 (in addition to SNMPv1) support for Windows operating systems.
 - SNMPv1 and SNMPv3 support for Linux operating systems.
 - RSA key size less than 2048 bits are not supported.

Known Issues
