# Schneider Electric

AR8395 Installation into the NetShelter SV

NetShelter SV cabinets ship with two accessory brackets installed.

Busbar AR8395 is compatible with NetShelter SV cabinets, but it requires an extra accessory bracket: AR824002 (set 2).

The AR8395 busbar has mounting pegs at the top and bottom, and a spring-loaded locking pin in the center.
The mounting pegs and locking pin should all be engaged with the accessory bracket for proper installation.
