

Field modification of AR7580A Vertical Cable Manager 6" D to 4" cable guides removed from a AR7721 Vertical Cable Manager

1. Remove the (8) x 10U sections of 6" cable guides (fingers) from the 2 backplates of AR7580A.
 - a. Using a flathead screwdriver unhinge the 16 tabs on each of the 2 cable management pieces. The 16 tabs are identified in the image below. A closeup of the hinge is provided below the diagram.

2. Gather the (8) 10U sections of cable guides from AR7721 and reinstall them on the (2) backplates of the AR7580As.
