### Create SchneiderUPS Task in Task Scheduler

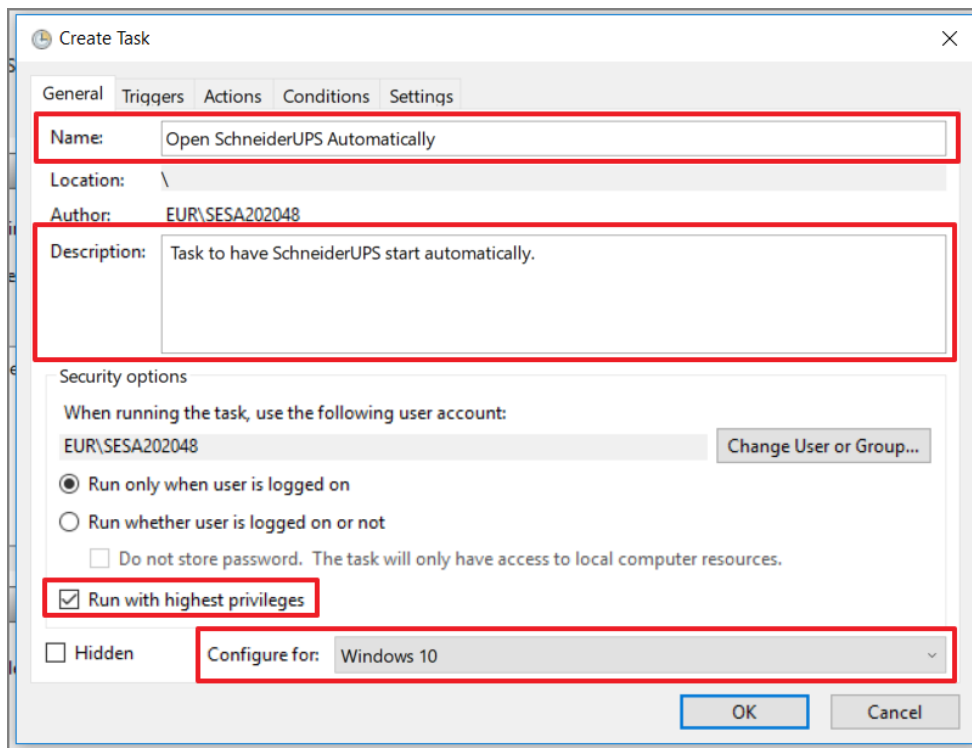

- Enter **Task Scheduler** in the search box and click enter or select Task Scheduler from **Best match**.

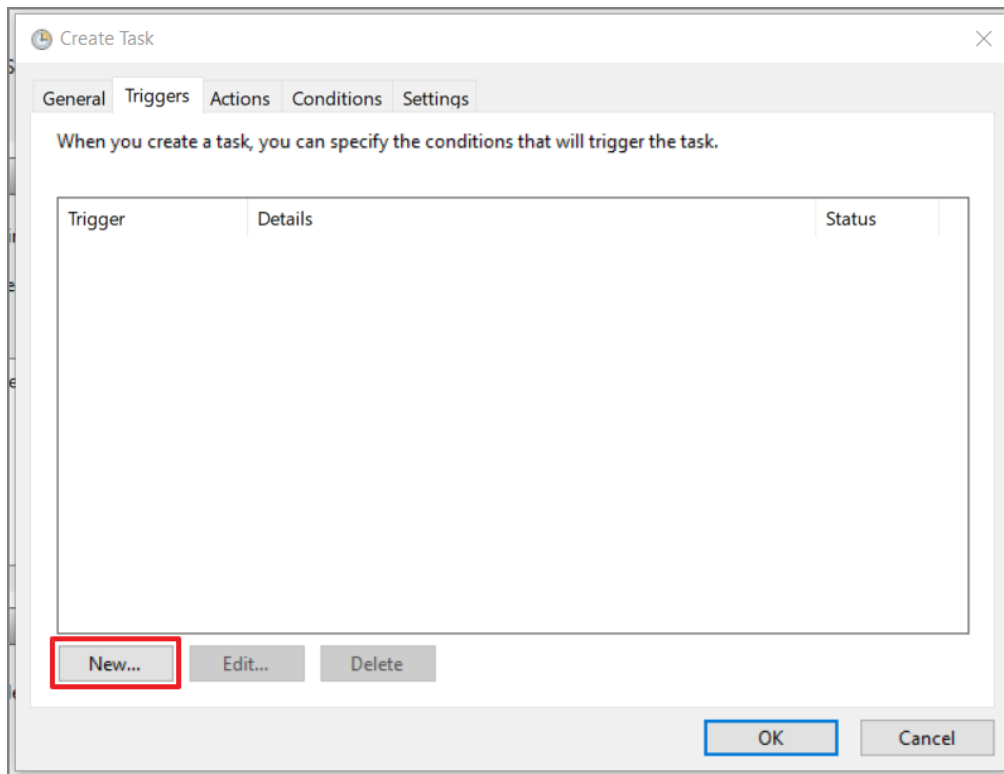

- Click **Create Task**.

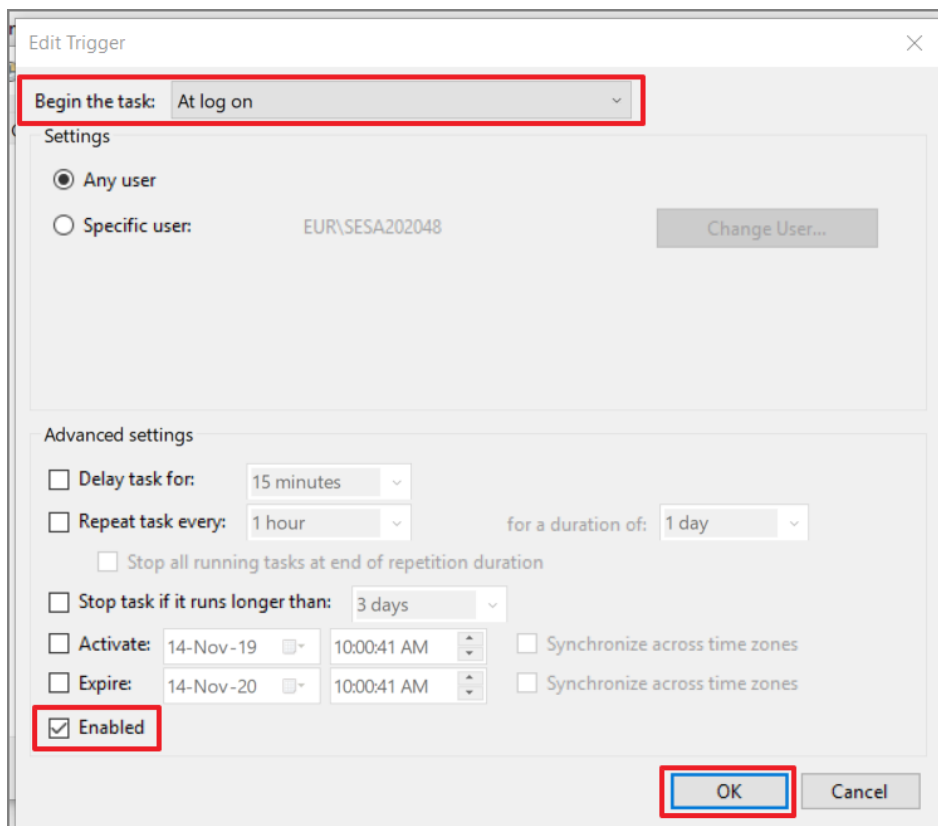

- In the General tab, enter a **Name** and **Description**. Check the **Run with highest privileges** checkbox and select your operating system from the **Configure for** dropdown list.

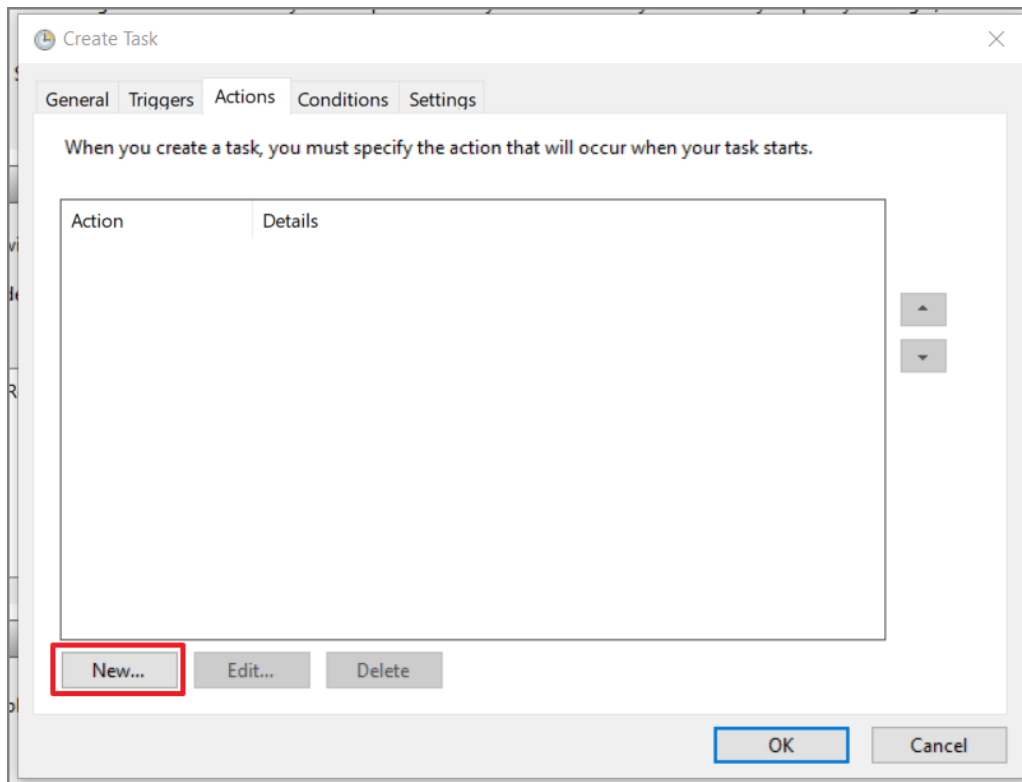

- In the **Triggers** tab, click **New**.

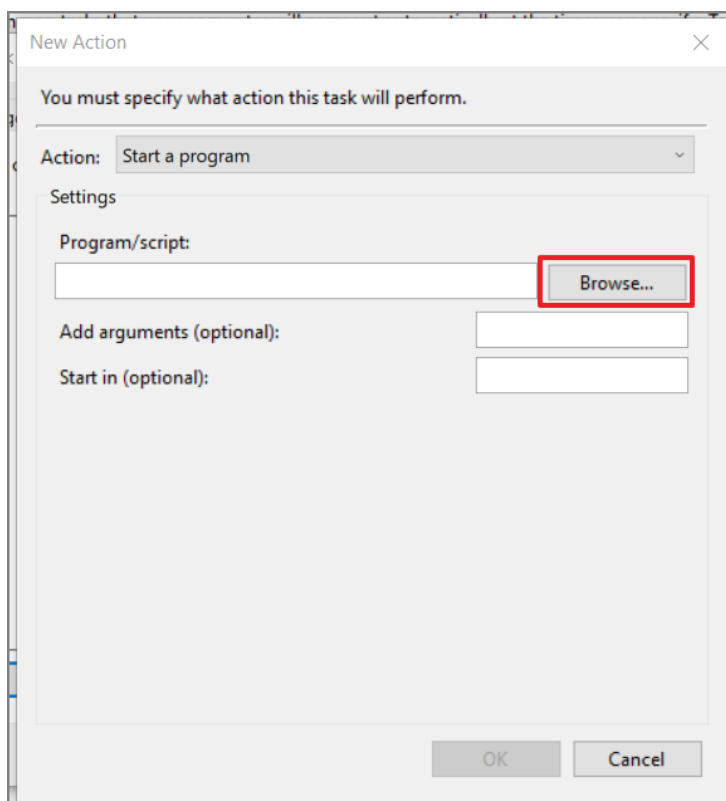

- From the **Begin the task** dropdown list select **At log on**. Make sure the **Enabled** checkbox is checked and click **OK**.

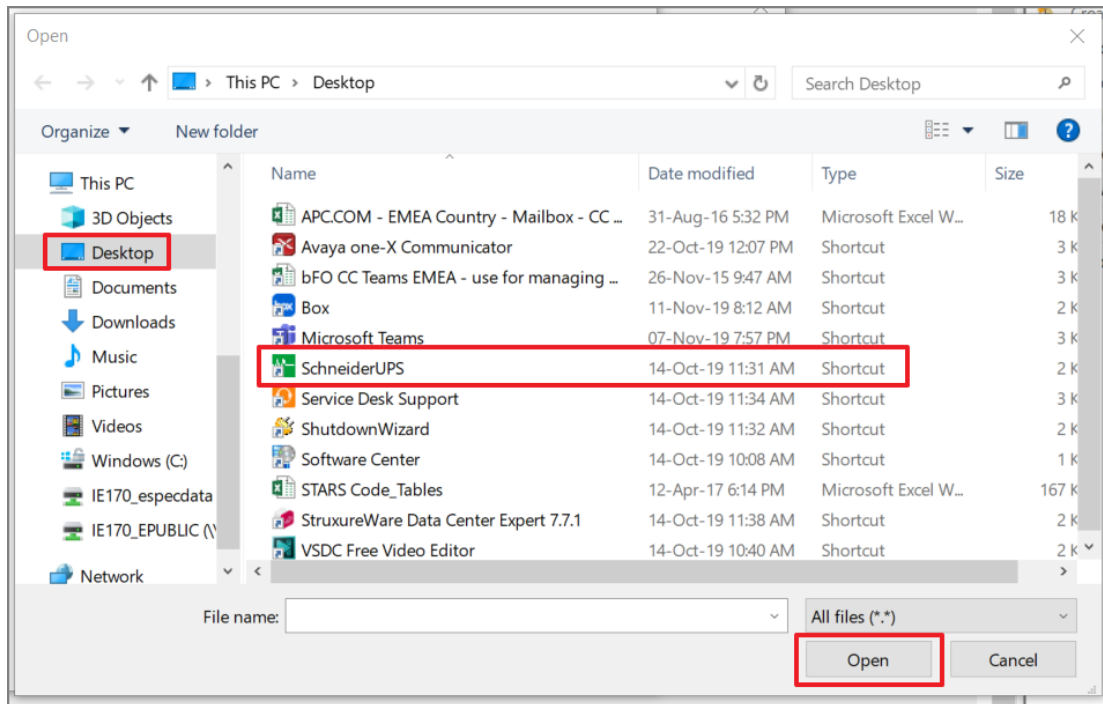

- In the **Actions** tab, click **New**.

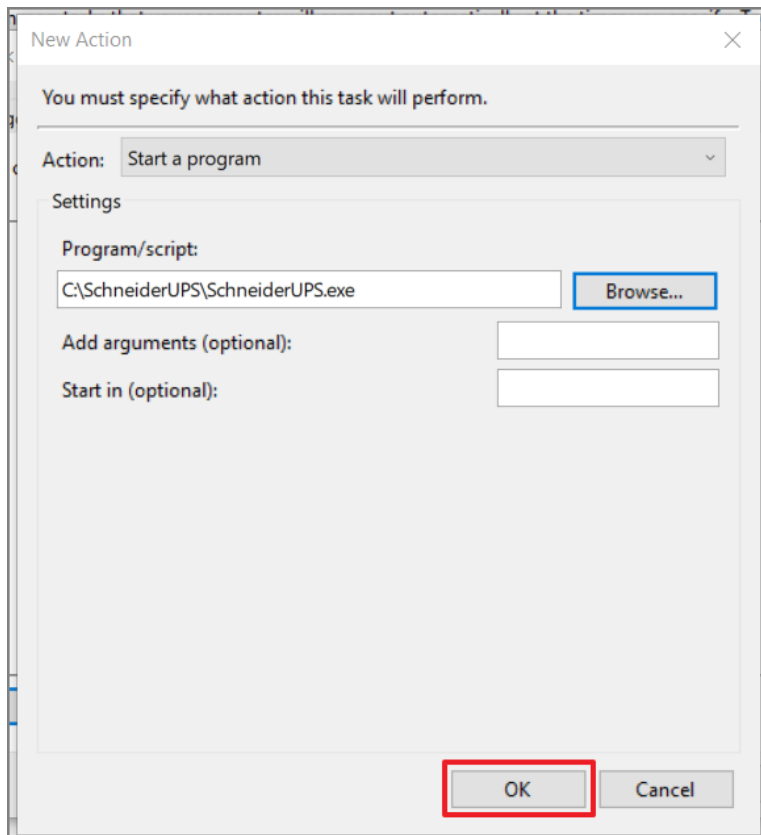

- Click **Browse**.

- Select **Desktop** from the side list. Once desktop has been selected click on **SchneiderUPS** and then **Open**.

- Click **OK**.

- In the **Conditions** tab, uncheck **Start the task only if the computer is on AC power** checkbox.

Specify the conditions that, along with the trigger, determine whether the task should run. The task will not run if any condition specified here is not true.

**Idle**

☐ Start the task only if the computer is idle for: 10 minutes

Wait for idle for: 1 hour

☒ Stop if the computer ceases to be idle

☐ Restart if the idle state resumes

**Power**

☐ Start the task only if the computer is on AC power

☒ Stop if the computer switches to battery power

☐ Wake the computer to run this task

**Network**

☐ Start only if the following network connection is available:

Any connection

OK Cancel

- In the **Settings** tab, uncheck the **Stop the task if it runs longer than** and the **If the running task does not end when requested, force it to stop** checkboxes. Once unchecked click **OK**.

Specify additional settings that affect the behavior of the task.

☒ Allow task to be run on demand

☐ Run task as soon as possible after a scheduled start is missed

☐ If the task fails, restart every: 1 minute

Attempt to restart up to: 3 times

☐ Stop the task if it runs longer than: 3 days

☐ If the running task does not end when requested, force it to stop

☐ If the task is not scheduled to run again, delete it after: 30 days

If the task is already running, then the following rule applies:

Do not start a new instance

OK Cancel

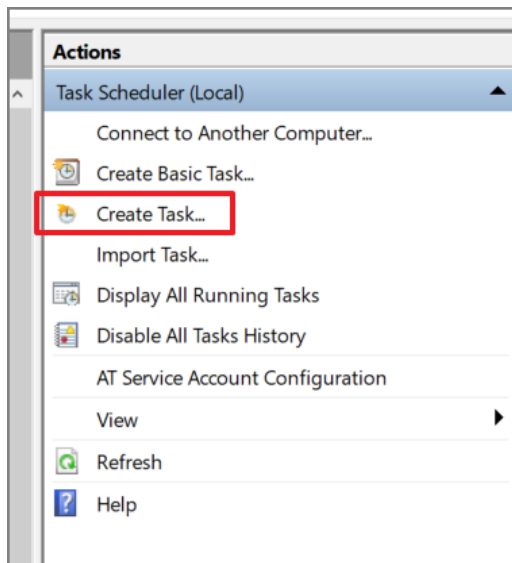

- You will now see the task listed in the **Task Scheduler Library**.
