

Standalone models

- Unique code, high-level coding conforming to ISO 14119
- 2 OSSD safety outputs
- Embedded EDM (external device monitoring)
- Manual or automatic start/restart depending on model
- Male 8-pin M12 connector
- IP 69K
- Numerous possible mounting configurations due to rotary transponder and symmetrical design
- Operation possible without safety control unit

Category 4/PL = e and SIL3

XCSRC11AM12 and XCSRC11MM12
Unique pairing (1)

XCSRC31AM12 and XCSRC31MM12
Two new pairings possible (2)

Page 30421/4

Daisy-chain models for series connection

- Unique code, high-level coding conforming to ISO 14119
- Up to 20 switches can be connected in series without impacting the safety level
- 2 OSSD safety outputs
- 2 male 5-pin M12 connectors for direct series connection
- IP 69K
- Diagnosis of the whole chain of switches possible using the optional diagnostic module (see page 30421/7)
- Numerous possible mounting configurations due to rotary transponder and symmetrical design

Category 4/PL = e and SIL3 (if combined with an appropriate Preventa XPS safety control unit category 4/PL = e - SIL3)

XCSRC12M12
Unique pairing (1)

XCSRC32M12
Two new pairings possible (2)

Page 30421/5

Single models for point-to-point connections

- Unique code, high-level coding conforming to ISO 14119
- Point-to-point connection to a safety controller or safety PLC
- 2 OSSD safety outputs
- Male 5-pin M12 connector
- IP 69K
- Numerous possible mounting configurations due to rotary transponder and symmetrical design

Category 4/PL = e and SIL3 (if combined with an appropriate Preventa XPS safety control unit category 4/PL = e - SIL3)

XCSRC10M12
Unique pairing (1)

XCSRC30M12
Two new pairings possible (2)

Page 30421/6

(1) The reader and transponder are supplied together, already paired in factory with a unique code.

(2) For these switches, the reader and transponder are supplied together, already paired in factory with a unique code. However, the reader can be re-paired (twice only) with a new (blank) transponder (see page 30421/7). Once the new transponder has been paired, the previous transponder is no longer usable. A new, blank transponder can only be paired once.

Type of contactless RFID switch		Standalone XCSR _• 1AM12 and XCSR _• 1MM12	Daisy-chain XCSR _• 12M12 and XCSR _• 32M12	Single XCSR _• 10M12 and XCSR _• 30M12
Environment				
Conforming to standards		ISO 14119, EN/IEC 60947-5-2, EN/IEC 60947-5-3 UL 508 (1), CSA C22.2 SIL 3 (IEC 61508), SILCL 3 (IEC 62061), PL _e -Cat.4 (EN ISO 13849-1)		
Product certifications		CE, cULus, TÜV, FCC, EAC, IC, RCM, E2, ECOLAB		
Maximum safety level (2)		SIL3 conforming to EN/IEC 61508, PL=e, category 4 conforming to EN/ISO 13849-1		
Ambient air temperature	For operation	°C	-25...+70 °C (-13...+158 °F)	
	For storage	°C	-40...+85 °C (-40...+158 °F)	
Vibration resistance	Conforming to EN/IEC 60068-2-6		10 gn (10...150 Hz)	
Shock resistance	Conforming to EN/IEC 60068-2-27		30 gn, 11 ms	
Protection against electric shock	Conforming to EN/IEC 61140		Class III	
Degree of protection	Conforming to EN/IEC 60529		IP 65, IP 66, IP 67	
	Conforming to DIN 40050		IP 69K	
Materials		Thermoplastic housing (Valox™)		
Characteristics				
Rated operating characteristics (3)		U _e : 24 V $\overline{\text{---}}$, -20%...+10%, I _e : $\overline{\text{---}}$ 60 mA (without load)		
Rated impulse withstand voltage (U _{imp})	Conforming to EN/IEC 60947-5-2	kV	0.8	
Integrated output protection		Short-circuit protection		
Connection	Conforming to EN/IEC 60947-5-2-A3 and EN/IEC 61076	M12 connector (A coding)		
Safety outputs 2 PNP NO OSSDs (output signal switching devices)	Maximum current	mA	400	200
Maximum switching frequency		Hz	0.5	
Delay	Power-on	s	< 5	
Typical response time (on transponder entry into operating zone)		ms	250 ms	120 ms + 50 ms per additional switch
Risk time (on transponder exit from operating zone)		ms	< 120 ms	< 120 ms + 18 ms per additional switch
Probability of dangerous failure per hour PFH _D	Conforming to EN/ISO13849-1 and EN/IEC 62061		5 x 10 ⁻¹⁰	
Tightening torque	M4 retaining screw		1.5 Nm (13 lb-in)	
	M12 connectors		1 Nm (8.85 lb-in)	
Mission time (TM)		20 years		
RFID protocol		Based on ISO 15693		
Functions				
Functions		- Operation possible without safety interface - Manual or automatic restart depending on model - External device monitoring (EDM)	- Integrated series connections - Connection to a safety interface (safety relay, for example) - Series diagnostic (with diagnostic module XCSR _D 210MDB)	- Point-to-point connection to a safety interface (safety controller or safety PLC, for example)

(1) The switch safety function has been assessed by TÜV Nord, not by UL.

(2) With an appropriate, correctly connected safety control system for Daisy-chain and Single models.

(3) Use a safety extra-low voltage (SELV) or protected extra-low voltage (PELV) power supply.

RFID contactless safety switches

XCS_616_CP_SCT16004

XCSR210MDB

Diagnostic module for Daisy-chain RFID safety switches

The **XCSR210MDB** module interprets the diagnostic data from the whole chain of switches and makes this information available into Modbus registers. There are two RJ45 Modbus communication connectors available for connecting external peripheral devices (such as an HMI terminal, for example).

Main characteristics of the diagnostic function:

- It provides the state of all the **XCSRC•M12** switches monitored by the safety chain.
- It identifies which protection devices are opened or closed.
- It helps to prevent from a restart of the machine if the chain has been unintentionally or deliberately tampered with; if an error has been detected on any of the safety switches; or if any of the wiring becomes disconnected.
- It detects if the loopback device **XCSRZE** is not connected and helps to prevent from a new start until the loopback device has been reconnected and a new power cycle completed.
