SMART HOME VOICE TRENDS

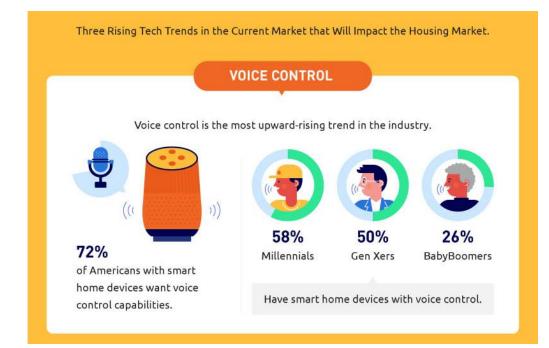

Voice Sells Product!

SMART HOME INDUSTRY TREND

76% of smart home products are being controlled by smartphones.

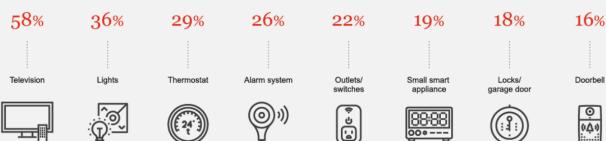

https://digitized.house/infographic-43-smart-homes-facts-and-stats/

VOICE ASSISTANTS INFLUENCE PURCHASES

Voice assistants influence smart home purchases, and vice versa

44%~of consumers have used their voice assistant to control another smart device in their home:

When shopping for a smart home device or product 89% of consumers said they were influenced by its compatibility with their voice assistant. The reverse is also true—85% said a smart device(s) they owned influenced what kind of voice assistant they used/purchased.

SMART VOICE FOR C-BUS

Voice Control is a must have for today's Smart Home Hardware Vendors

WHY VOICE CONTROL IS IMPORTANT

Voice Control is a must have for today's Smart Home hardware vendors

VOICE CONTROL SELLS

The ability to control smart home tech via voice is taken as a standard requirement in today's market. With over 3 million active smart speakers in Australia, voice and C-Bus is a must have

INTEGRATION OF DIFFERENT TECHNOLOGIES

Using Smart Voice, it is possible to integrate C-Bus with other solutions, such as Philips Hue, LIFX and new cloud based solution in a seamless way

VOICE CONTROL SUPPORTS NEW MARKETS

Markets such as aged care, disability care and health care as well as hotels are on the path for customer support models which include voice control. Voice control simplifies the user interface and provides control where otherwise none exists.

VOICE UNIFIES ALL CONTROLS

Voice can unifies multiple hardware backends into a single user interface, therefore vastly improving the user experience and simplicity of use.

Apple Home App (Real C-BUS objects)

WHO WE ARE?

Smart Automation Systems has been delivering Smart Building Services since 2010, specializing in residential building technology design, delivery and installation. Our Company comprises of two key business areas:

- Integration Services
- Technology Services

Integration Services

- Delivers high end automation projects
- Tests latest innovations
- Partners with builders, architects and project managers for large scale project deliveries

Technology Services

- Develops and maintains Smart Voice and connecX Platforms
- Delivers voice control projects for customers
- Delivers prototypes of voice, portal and apps for customers
- Designs, delivers and manages customer platforms

OUR SERVICES - INTEGRATION

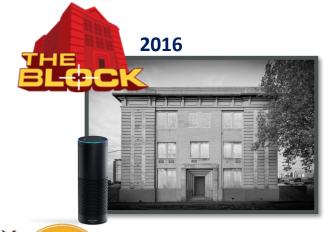

Smart Automation Systems

- A certified Home Automation Integration partner, specializing in high-end automation solutions and voice control since 2010
- * Residential and commercial automation solution design and installation
- ❖ Point One (Eco Expert) Partner of Schneider Electric
- Team of young automation engineers, all with engineering qualifications

What we bring

- Software we build is tested directly with our customers
- We "walk the talk"
- Understanding of "Smart Home" and all the tech involved to create high end luxury customer experiences
- Partnership with many Smart Home hardware suppliers

SMART VOICE

www.smartvoice.com.au

Smart Voice is a SAS (software as a service) cloud platform, providing voice services for the residential and commercial building market. Smart Voice was created to provide voice control for Smart Home equipment not natively able to provide this control.

- Commercial and Residential Cloud Software as a Service (SAS)
- Integrating back-end automation systems with front end voice assistants

- ✓ Smart Home Residential/Commercial
- ✓ Hotel and Building
- ✓ Aged Care & Disability
- ✓ Call Centre

What we bring

- Experience in building Smart Home platforms across multiple backend systems
- * Existing relationships with a number of hardware vendors with access to their APIs
- Partnership with Schneider and AWS for Smart Voice SAS
- We understand Voice Control

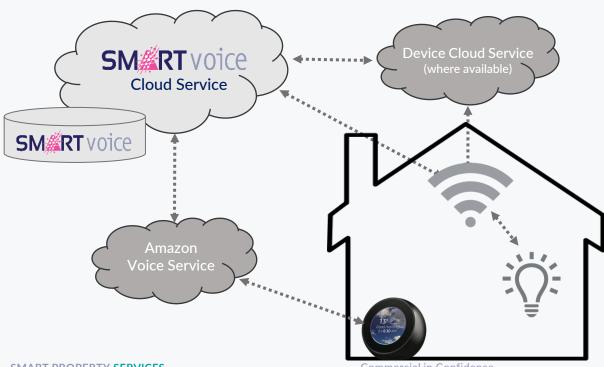

PRODUCT: SMART VOICE CLOUD PLATFORM

The Smart Voice cloud platform provides a one-stop integrated solution for connection of smart home hardware to front end voice assistants. Connection can be cloud to cloud or cloud to local network.

ACTIONS TO GET UNDERWAY

- ☐ Visit, www.smartvoice.com.au for more information and videos
- ☐ Visit, https://smart-voice.myshopify.com/password?password=SMARTVOICE2018
 - ☐ Purchase an up and start license \$195 (ex GST) or a 5 pack at 20% off list price
 - ☐ For Siri also purchase a Smart Voice Bridge
- Purchase and set up your google home, amazon echo or use Siri
- ☐ You will be up and running within the hour
- ☐ Additional support available check out https://smartautomationsystems.freshdesk.com/support/solutions

ALEXA IN AGED CARE

Luson is using Alexa devices in combination with Smart Voice and with a specialized Luson Alexa skill, developed by our services company Smart Voice Services. We are proud to be part of this innovative project to bring a better quality of life to aged care.

Tech innovation in aged care

NEW VOICE ACTIVATED TECHNOLOGY IS BRIGHTENING LUSON AGED CARE RESIDENTS' DAYS BY ASSISTING IN A VARIETY OF WAYS TO INCREASE AUTONOMY.

GEELONG'S Luson aged care is paving the way for aged care homes of the future by introducing voice activated technology into its The Vue aged care home to boost residents' independence.

A recent study conducted in the UK has concluded that voice assistants can help older people feel less lonely and can act as a mood booster and support their emotional

Luson has recently engaged Smart Voice Services to bring Alexa voice control to their Grovedale aged care home, including a trial of voice control in residents' rooms, allowing them to control lights, climate and their TV by voice.

They are also able to check the news, the weather, read a book, find what activities are happening at The Vue during the day or what movies are screening in the newly decked out cinema room.

The trial has been so successful that Alexa was voted "employee of the month" by one of the residents.

Further to personal room use. voice control has also been deployed in the very high-tech cinema, where a

sensor placed outside of the room triggers an automated update by Alexa on the upcoming movie and

Anyone passing by can also ask the Amazon Echo unit which movies are showing during the week.

A simple push of a button on the cinema remote can trigger a movie scene, turning on the projector screen and dimming the lights.

A popcorn machine is also on its

A 'tech hub' has been set up, featuring an Alexa voice-controlled speaker. Residents can make enquiries about what is on at The Vue, explore upcoming major events, news, obtain general information or check the world news and play

In the future Luson plans to bring Smart Displays to the home, removing the need for messy notice

These Smart Displays will act as touch screen information panels. which can also be controlled by

Residents will be able to enquire about all documents currently

available on the noticeboard, read the menu, check the activities and much

There will also be the option for families to add a voice-controlled speaker to a resident's room, enabling

them to leave voice messages or call them using a voice speaker in their

Luson has partnered with Smart Voice Services to deliver these aged care voice projects.

The future of voice control in aged care is here now, and Luson is leading

For more information head to www.luson.com.au

EXAMPLE PROJECTS

- 1. Residential, key deployment areas, kitchens, living, family and bedrooms supports scenes, video calls and integration to AV
- 2. Hotels, support not only smart room control as well as concierge services and room service
- 3. Commercial board rooms, for lighting, blinds, AC and AV control
- 4. Aged care supports increased independence
- 5. Many Smart Voice projects deployed also with Environexus Nero
- 6. Works very well with Savant, providing voice control for individual voice control on joint Savant and C-Bus projects
- 7. Also check out our Easy Blinds solutions, supports C-BUS and Somfy RTS motor integration
