What user should do when they face issue to launch Ecostruxure power commission??

Ecostruxure power commission needs to follow mandatory prerequisites :

Please refer installation guide with the help of local IT team before installing EPC in your machine by referring this link :
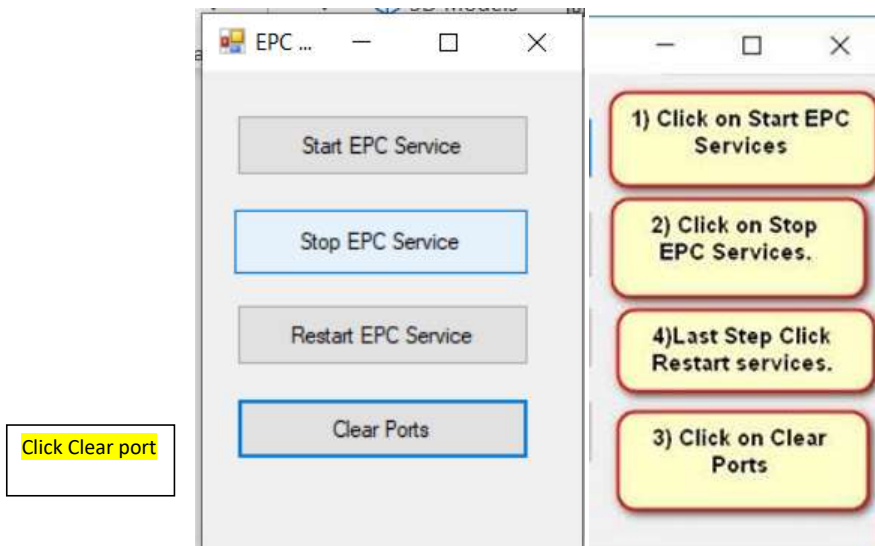

https://www.se.com/us/en/product-range/62980-ecostruxure-power-commission-software/#documents

Error – Port In use

Run clear port utility file in your machine (utility)file is attached .

How to run clear port utility file :

- Before running this application make sure that EPC is not running on your computer. The application is attached as a zip file. Please extract the content of the zip file before running the application.

- Please see the picture below to execute the attached application.

Click Clear port

Commented [RK1]:

Note: **Click clear ports "

<mark>After running this application, Launch EPC.</mark>
